

Wherever we GO, we EXCEED!

Technological Consortium for Awareness, Readiness, and Advancement of Knowledge in Innovation

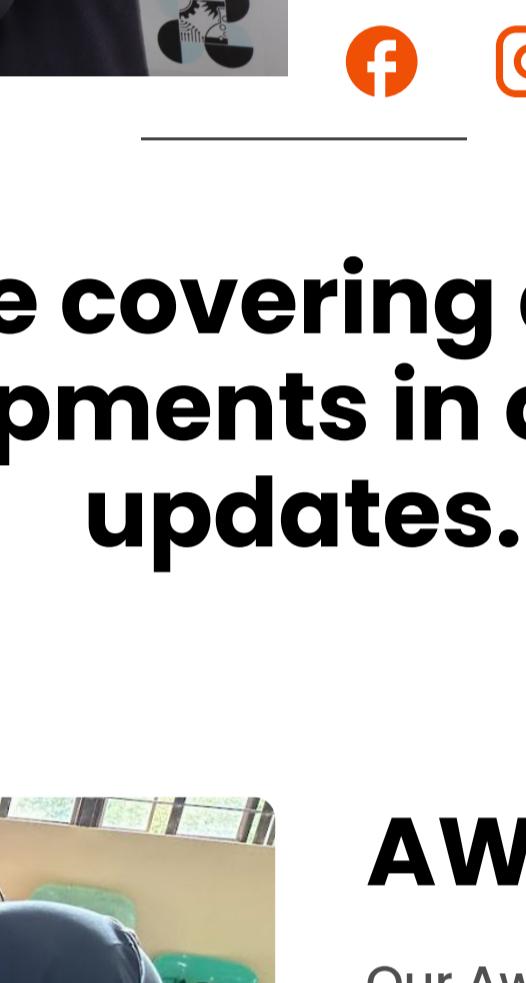

[Learn More](#)

About Us

TARAKI envisions to be the country's leading technological consortium in building and transforming the Cordilleran Startup Ecosystem. We cultivate ingenuity for innovators by fostering collaboration and community-driven initiatives, aiming to become globally renowned.

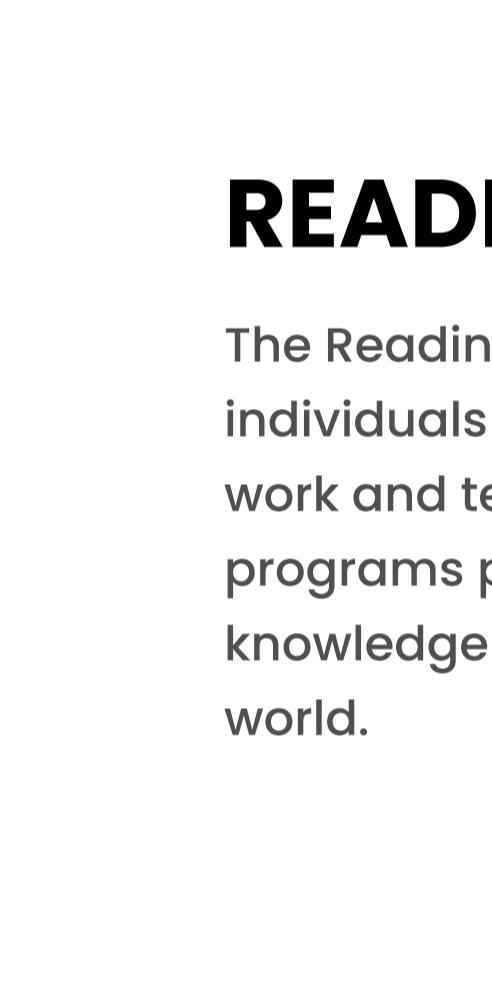

Objectives

Establishment of a 5-yr Regional Startup Development Plan and Roadmaps

Increasing Awareness about the Consortium

Upskilling and Upscaling Activities

Establishment of Local Investor Network

Cross Pollination Undertakings Among Stakeholders

Activating startup activity hubs in lesser active provinces in the regions

Taraki's Team

At TARAKI, our team is dedicated to driving technological innovation and fostering a collaborative environment for growth and advancement. Our experts bring diverse backgrounds and a shared commitment to our mission.

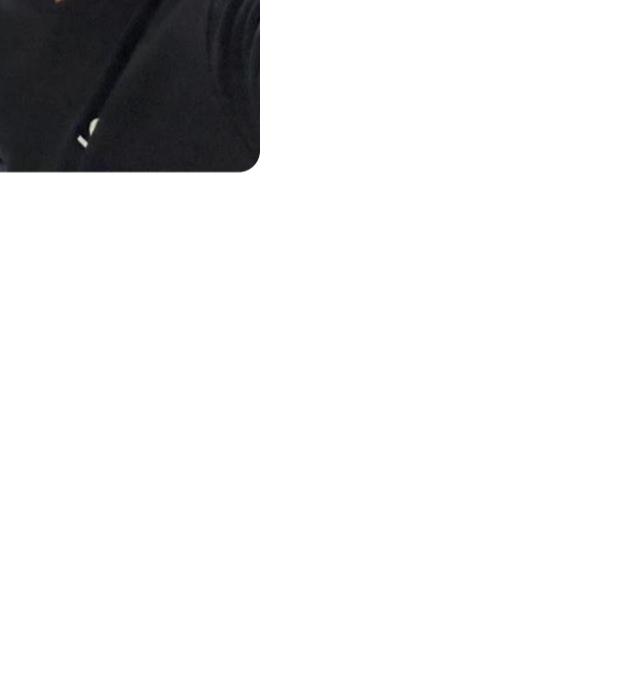

Dr. Thelma D. Palaoag Project Leader

Dr. Thelma brings over 20 years of experience in technology and innovation. Her visionary leadership has been instrumental in shaping TARAKI's strategic direction.

Jade P. Jimenez Project Assistant

Jade is a seasoned technologist with a passion for cutting-edge innovations. He oversees all technology initiatives, ensuring TARAKI remains at the forefront of industry advancements.

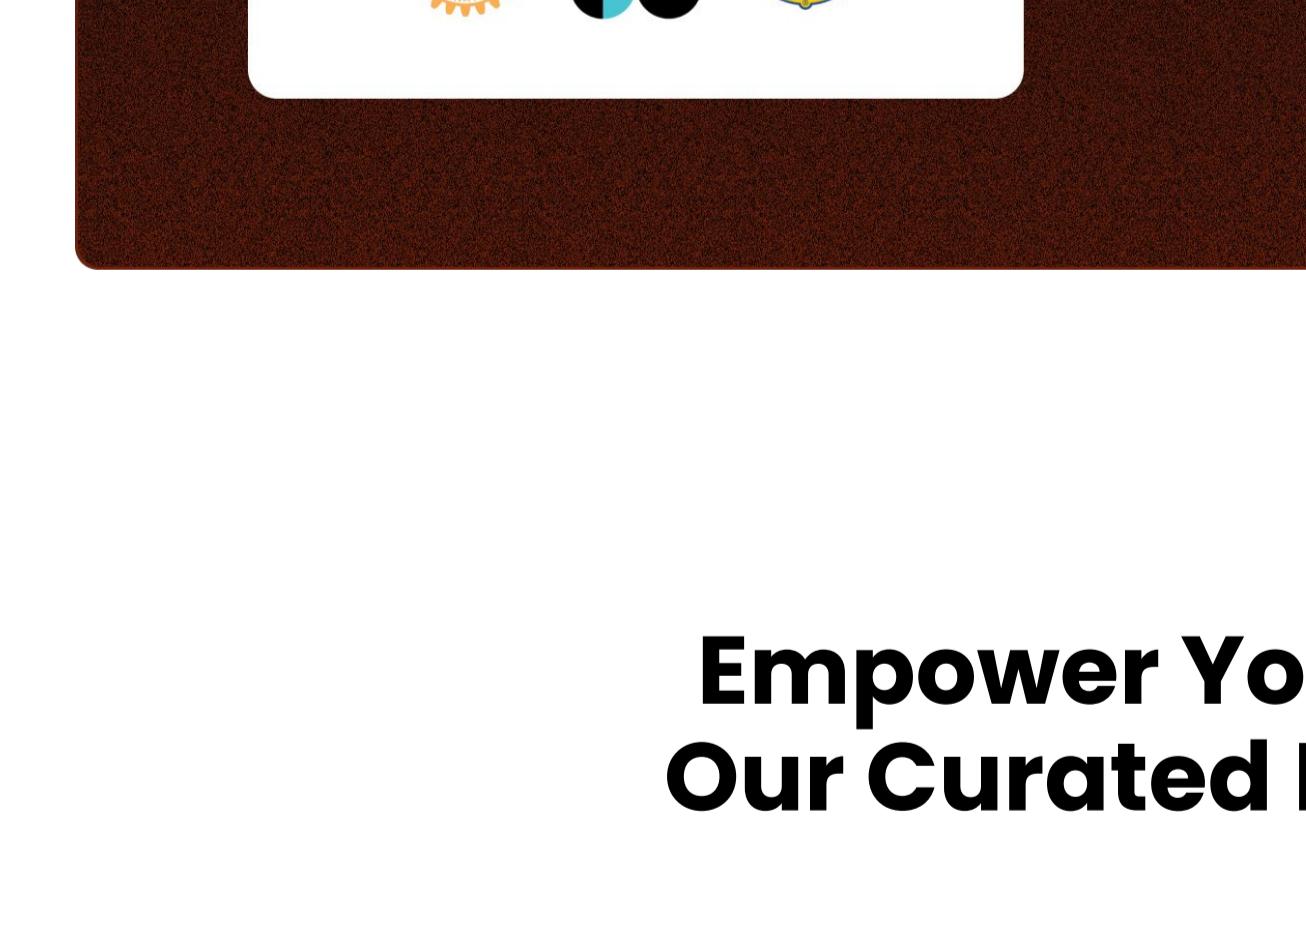

Jezelle Startups

Jezelle is a passionate overseer of TARAKI's advancement.

We're covering a lot of developments in our news updates.

AWARENESS PROGRAM

Our Awareness Programs are designed to educate and inform participants about the latest trends, challenges, and opportunities in technology and innovation. These programs aim to build a strong foundation of knowledge and inspire participants to engage with emerging technologies.

READINESS PROGRAM

The Readiness Programs focus on preparing individuals and organizations for the future of work and technological advancements. These programs provide the necessary skills and knowledge to thrive in a technology-driven world.
